EXPERIENCE

Full Stack Developer | CGS Canada (Computer Generated Solutions)

APRIL 23RD 2018 – PRESENT

Developed full stack applications for multiple fortune 100 companies. Led development team and launched a pilot of a cross-platform collaborative AR (Augmented Reality) application for web, mobile, and wearable devices. This is currently in use by major telecom and technology companies. I traveled and performed technical demonstrations and presentations to major organizations which increased product interest, funding and ultimately sales.

EDUCATION

IT: Programmer-Analyst | New Brunswick Community College

SEPTEMBER 2016 – JUNE 2018

Gained the fundamentals of software development and consultation. The final project consisted of consulting and developing a solution to improve company operating efficiency with and without software. Presented findings, designed, and developed new procedures adhering to business rules and other requirements. The major technical piece was a product distribution management system which auto-generated delivery routes and order loading.

KNOWLEDGE

Frameworks/RTE: React Native, Node.js, Express

Languages: JavaScript, TypeScript, C#, Java

Libraries: React, Redux, Twilio SDKs, Three.js, Arduino

Databases: MongoDB, PostgreSQL, MySQL, SQL Server

Programs: Adobe Suite, Unity

Additional skills:
- Computer hardware, server administration, and networking.
- Electronics, robotics, 3D printing, and modeling.
- Audio, video, and image editing.

ACTIVITIES

Twilio Signal Conference – San Francisco, CA

OCTOBER 16-18TH, 2018

Gained knowledge from keynotes, breakout sessions, discussions with vendors, and other attendees. In addition I attended Twilio Superclass, a pre-conference event to gain hands-on experience with various Twilio products and services alongside Twilio engineers.
