💼 EXPERIENCE

Developer | CGS Canada (Computer Generated Solutions)
APRIL 23RD 2018 – PRESENT

- Actively developing applications with the MERN stack integrating AR and chatbot technologies. Extensive development experience with the Twilio platform.
- Developed applications for fortune 100 companies. Experience in both server-side and front-end development, including APIs.
- Performing various tasks in quality assurance, animation/design and eLearning content development.

🎓 EDUCATION

IT: Programmer-Analyst | New Brunswick Community College
SEPTEMBER 2016 – JUNE 2018

- Developed a full-stack PDMS (Product Distribution Management System) using ASP.NET Core for a fictional bottling company.
- Consulted the aforementioned company of current protocols and systems. Presented findings and prepared a non-exclusive technological solution adhering to business rules.
- Gained an understanding of appropriate techniques and processes in software development, testing/quality assurance and documentation.

🛠 KNOWLEDGE

Frameworks/RTE: Node.js, Express, ASP.NET Core

Languages: JavaScript, C#

Libraries: React, Redux, Three.js, Arduino

Databases: MongoDB, PostgreSQL, MySQL, SQL Server

Additional skills in the following:

- Computer hardware, server administration and networking.
- Electronics, robotics, 3D printing and modeling.
- Audio, video and image editing.

⋯ ACTIVITIES

Twilio Signal Conference – San Francisco, CA
OCTOBER 16-18TH, 2018

Attended Twilio Superclass, a pre-conference event to hands-on experience with new products alongside Twilio engineers. Gained knowledge from keynotes, sessions and discussions with vendors and other attendees.
